Patent registered
MULTI FUNCTION KEY SPOTTER
Memo-Key®

Art. 8108 Patent registered Multi function key spotter „Memo-Key®“

Pat. Nr. 10 2005 061 283

4 Functions: → memorises locking → colour identification
 → pocket protection → key protection

Made of flexible plastics the Memo-Key® is suitable for the mostly applied key heads. The used colours are free of heavy metals and azo colours.

Connecting the cap with the front of the key locking becomes a conscious process that always can be verified with a look on the key. Furthermore the cap protects the key against damages by falling down and pockets of trousers or jackets against damages due to the sharp front of the key.

Artikel 8108 subject to technical changes
Accuracy of shown colours cannot be guaranteed.
